DETAIL ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-20 are pending.
2. The prior art submitted on February 27, 2006 has been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Marko et al. (6,745,151).
5. As per claim 1, Marko et al. disclose the invention as claimed which includes the steps of receiving vehicle performance data at a telemetric device from at least one vehicle system, processing the received vehicle performance data, and producing vehicle system performance data based on the processed vehicle performance data (see at least figures 2 and 4, column 1, line 55 to column 3, line 12). Marko et al. further

disclose a communication step for communicating the vehicle system performance to a service provider (see at least figure 1, item 11 and figure 2, items 26 and 27).

6. As per claims 2-4, Marko et al. also disclose the steps of evaluating the received vehicle system performance data, flagging the data as valid or invalid when it is within or not within an expected range, and storing those data (see at least figures 2, 4 and column 2, line 42 to column 3, line 12, column 3, lines 40-60).

7. As per claims 5-9, Marko et al. further disclose the bi-directional communication between the vehicle and the remote provider for obtaining the information needed in diagnostic/prognostic system (see at least figures 2 and 4-6, column 3, lines 12-32, column 4, line 21 to column 6, line 6).

8. As per claim 10, Marko et al. also disclose the recited limitation in at least column 6, lines 10-28).

9. With respect to claims 11-20, the limitations of these claims have been noted in the rejections above and disclosed in the Marko et al. reference. They are therefore considered rejected as set forth above.

Conclusion

10. All claims are rejected.

11. The following references are cited as being of general interest: Thakore et al. (5,255,208), Scholl et al. (5,400,018), Moskowitz et al. (6,339,736), Mahoney et al. (6,941,208), Yamaki (2002/0161495) and Sonnenrien et al. (2006/0095174).
